

Master of Science in Tropical Forestry and Management

- Call for applications -

The Institute of International Forestry and Forest Products of TU Dresden is inviting candidates for joining the two-year Master programme of **Tropical Forestry and Management**.

The Master course aims at qualifying graduates to be capacitated to face the challenges of sustainable forest management in the tropics and subtropics. Special emphasis is given to changing frame conditions of environment, politics and society. Furthermore, the studies provide expert knowledge to handle manifold human-forest interactions and sustainable development issues. Its international orientation and socio-economic focus make this programme unique in Europe.
